

AMENDMENT

IN THE CLAIMS

Please amend the claims as follows:

1-80. (canceled)

81. (currently amended) An apparatus for delivering voltage pulses to tissue so as to establish an electric field sufficient to assist the topical introduction of a therapeutic agent into a cell of a tissue, wherein the apparatus comprises:

- a) a detachable electrode support member having disposed thereon ~~(one)~~ or more opposing pairs of electrodes arranged relative to one another to form an electrode array, and further comprising an electrode cover and a cosmetic reservoir disposed between the electrode cover and electrode array, wherein the cosmetic reservoir is in fluid communication with the electrode array; and
- b) a power supply in electrical communication with the pair(s) of electrodes disposed in the support member, wherein the power supply provides voltage pulses to at least a pair of the electrodes to effect electroporation.

82. (original) The apparatus according to claim 81, wherein said apparatus is configured to be hand-held.

83-87. (canceled)

88. (original) The apparatus according to claim 87, wherein said reservoir comprises a porous reservoir.
